Clinic Reminders

Clinic Topic: Understanding Progression Building through PSIA-AASI’s Teaching Fundamentals – Matt Boyd

1. We will review the Teaching Fundamentals:
   a. Collaborate on long-term goals & short-term objectives
      i. What are different ways we can collaborate with our students?
   b. Manage information, activities, terrain selection and pacing.
      i. What are different ways to manage each of these?
   c. Promote play, experimentation, and exploration.
      i. What does this mean, what does it look like, and what actions can we take?
   d. Facilitate the learner’s ability to reflect upon experiences and sensations
      i. What are different ways we can facilitate this ability
   e. Adapt to the changing needs of the learner.
      i. What adaptations might we need to make – What can trigger the need to adapt.
   f. Manage emotional and physical risk.
      i. What is the difference between these two types of risk? How can we manage both? Examples?

2. After reviewing and growing our awareness of these fundamentals, we will lay out a roadmap to implementing them based on a traditional example of a progression.
